

PureClin SAN

Drycleaning Detergent for Hygienic Freshness

PureClin SAN is an anionic drycleaning detergent for use in all perchloroethylene and hydrocarbon solvent drycleaning machines.

The innovative combination of surfactants in **PureClin SAN** offers hygienic freshness and fibre-deep purity of the cleaned textiles.

As a result of the hygienic properties of **PureClin SAN**, the drycleaning solvent becomes odour-neutral.

PureClin SAN reliably prevents electro-static charges and lint formation on the textiles during drying.

Lint deposits within the drycleaning machine are essentially reduced by **PureClin SAN**.

PureClin SAN guarantees excellent drycleaning results, optimizes greying inhibition and produces clearly defined colours on all fibre materials. Fibre-caring components provide the textiles with a pleasant soft handle.

PureClin SAN essentially reduces finishing work by integration of an active ironing aid.

Recommended Dosage: in case of 0,5 - 0,75 % of load capacity
5 – 7,5 ml of **PureClin SAN** per kg of drycleaning goods

Application:

PureClin SAN is to be used concentrated and is suited for all dosing systems.
