

Blankotex

Concentrated, highly active oxygen-based stain-removal salt

Properties:

Blankotex is ideal for all washable textiles and all temperature ranges from 30° to 90° C. The specific power of oxygen develops its action already from 30° C due to a bleaching activator which is quickly and easily degradable. At the same time it removes tenacious stains like coffee, tea, red wine, fruit juice, fruit, ketchup, vegetables, grass and other substances.

Blankotex contains enzymes and offers effective stain-removal action also in case of albuminous stains like blood, egg, milk or cacao.

Physico-chemical data:

Consistency: white powder
pH-value: 9,8 (1 % solution)
Bulk weight : 960 g/l

Ingredients (according EU-recommendation):

Oxygen-based bleaching agents over 30 %; anionic surfactants less than 5 %; enzymes

Additional Ingredients:

Bleaching activators, fragrances

Recommended Dosage:

Per kg dry laundry at a bath ratio of 1 : 4

Hardness Range	Water Hardness °dH	1-Bath Procedure	2-Bath Procedure	
			1. Bad	Bleichbad
1 - 3	0 - over 14 soft - hard	10 ml / kg		3 - 15 ml / kg
Output per kg of product with max. dosage in hardness range 1		104 kg
